13 March 2015

In 2014 we were approached by Money Management Educators who offered their educational services to our employees. We gratefully accepted their offer and were pleasantly surprised by the number of employees who signed up for the workshops.

The feedback from every participant was extremely positive and many of them subsequently elected to meet one-on-one with an advisor. I include myself among those who had one-on-one sessions so I can say first-hand that they were very informative and helpful.

On the basis of mine and our company's experiences with Money Management Educators I would have no hesitation in recommending them.

Sincerely

Bill Paul
